

OOP EVEN BABIES CAN UNDERSTAND

Object
Oriented
Programr

Use Pokémon.

Abi Bouhmaida
@forgoodcode

Let's create a class
Pokémon.

What do we know
about Pokémon?

Abi Bouhmaida
[@forgoodcode](#)

They have numbers,
they have attack stats,
they have nicknames,
they have four moves.

Abi Bouhmaida
[@forgoodcode](#)

We can create **subclasses**.

A Bulbasaur is a Pokémon that has access to certain moves, certain attack and defense stats.

Abi Bouhmaida
@forgoodcode

What's the difference
between a class and an
instance of a class?

Abi Bouhmaida
@forgoodcode

Well, we've programmed the recipe for a Bulbasaur, but if we create a Bulbasaur named Henry, Henry is a single instance of that Bulbasaur.

Abi Bouhmaida
[@forgoodcode](#)

Super effective form
of teaching :)
